THEOREMS.

1. The adjacent angles which one straight line makes with another straight line on one side of it are together equal to two right angles.
2. If at a point in a straight line, two other straight lines on opposite sides of it, make the adjacent angles together equal to two right angles, then these two straight lines are in one and the same straight line.
3. If two straight lines cut one another, the vertically opposite angles are equal.

Triangles.

4. If two triangles have two sides of the one equal to two sides of the other, each to each, and the angles included by those sides equal, then the triangles are equal in all respects.
5. The angles opposite to the equal sides of an isosceles triangle are equal.
6. If two angles of a triangle are equal to one another, then the sides which are opposite to the equal angles are equal to one another.
7. If two triangles have three sides of the one equal to the three sides of the other, each to each, they are equal in all respects.
8. If one side of a triangle is produced, then the exterior angle is greater than either of the interior opposite angles
9. If one side of a triangle is greater than another, then the angle opposite to the greater side is greater than the angle opposite to the less.
10. If one angle of a triangle is greater than another, then the side opposite to the greater angle is greater than the side opposite to the less.
11. Any two sides of a triangle are together greater than the third side.
12. Of all straight lines drawn from a given point to a given straight line the perpendicular is the least.

If a straight line cuts two other straight lines so as to make (i) the alternate angles equal or (ii) an exterior angle equal to the interior opposite angle on the same side of the cutting line or (iii) the interior angles on the same side equal to two right angles, then in each case the two straight lines are parallel.

14. If a straight line cuts two parallel lines it makes :—

Conversely, if two triangles have two sides of the one equal to two sides of the other, each to each, but the base of one greater than the base of the other, then the angle contained by the sides of that which has the greater base is greater than the angle contained by the corresponding sides of the other.

Draft Circular in connection with the Refund.

It is observed that members of the public are remitting money to the treasury towards the cost of books, without ascertaining whether the books are available in the Book Depot and finding out the exact cost of the book with the result that the money paid by them has had to be refunded to them and unnecessary work has devolved on the office and the treasuries.

Lists of books (English and Kannada) which are newly printed and are ready for sale in the Book Depot are being published in the Gazette, every month. The lists are also available with all the Government Book Selling Agents and the Government Branch Book Depot Keepers in the State.

The public are therefore requested to refer to the said lists or make enquiries at the Central Book Depot, Bangalore, in the matter, before they remit money to the treasury.

It is also noticed that in some cases applications for refunds have been received in manuscript forms. As refunds are arranged in separate printed forms prescribed, applications for refund may be kindly made only in the prescribed printed forms so as to comply with audit requirements.
